Crafting from imagination, where ideas come to life.

The International Finance Centre 6 building in St Helier, is a testament to our delivery of premium quality products and services. We take pride in the successful design and installation of the striking lower plinth granite rainscreen cladding, using the captivating Chinese blue granite with two distinct finishes, bush hammered and vertical ribbed, the façade radiates a perfect blend of texture and elegance.

Our team also meticulously crafted bespoke solid granite plinths, planters and benches in the extension, showcasing the exquisite beauty of light grey honed Chinese granite. To conclude the project, we supplied external granite paving, copings and kerbs, seamlessly integrating Portuguese and Chinese granite in a unified bush-hammered finish.

Le Pelley's foundation is built on dedication and we create masterpieces that leave a lasting legacy.
